

Build a 2 Meter Double Bazooka. Hang vertically for repeater use.

Coax is RG-58 (Note you can use 72 Ohm Coax but Feedline **MUST** be RG-58.

Do Not use any Coax that has a foil Shield, It will not work

Measurements must be precise. Feed is exactly in the center of the 67cm.

CABLE #12 is 300 ohm twin lead. This is a YY5RM Design.

<http://radioaficion.com/cms/antena-bazooka-para-vhf-2-metros/> (This is either in Spanish or Portuguese, you will have to translate in your browser) YY5RM is in Venezuela)
